

## INTERVIEW ANALYSIS REPORT

## I. EXECUTIVE SUMMARY

Candidate demonstrated strong technical clarity and structured communication with moderate stress under high-complexity prompts.

## II. CANDIDATE PROFILE

| Candidate Attribute | Details                  |
|---------------------|--------------------------|
| Name                | Alex Morgan              |
| Role Applied        | Senior Frontend Engineer |
| Experience Level    | Senior (6+ years)        |
| Interview Type      | Behavioral & Technical   |
| Session Duration    | 43m 09s                  |

## III. OVERALL EVALUATION SCORE

| FINAL SCORE         | COMMUNICATION       | CONFIDENCE          | STRESS LEVEL    |
|---------------------|---------------------|---------------------|-----------------|
| 8.64 <sub>/10</sub> | 8.40 <sub>/10</sub> | 7.90 <sub>/10</sub> | Moderate Stress |

## INTERVIEW ANALYSIS REPORT

## IV. BEHAVIORAL ANALYSIS

| Behavioral Marker                 | System Evaluation                                                                                                                                                                                                                          |
|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye Contact Stability             | <b>Observation:</b> Gaze toward camera ratio: 73.2%.<br><b>Interpretation:</b> Camera engagement patterns were monitored for consistency.<br><b>Impact:</b> Influences perceived trust and interview presence.                             |
| Facial Expression & Micro-tension | <b>Observation:</b> Facial tension ratio: 26.8%, smile presence ratio: 24.1%.<br><b>Interpretation:</b> Facial expressiveness and tension were tracked under load.<br><b>Impact:</b> Affects perceived composure during technical probing. |
| Head Movement & Engagement        | <b>Observation:</b> Head nod index: 10.90, posture shift ratio: 21.7%.<br><b>Interpretation:</b> Movement cadence indicates listening and emphasis behavior.<br><b>Impact:</b> Supports collaboration and communication signals.           |
| Posture Consistency               | <b>Observation:</b> 0.217 posture-shift ratio observed.<br><b>Interpretation:</b> Postural stability reflects cognitive load handling.<br><b>Impact:</b> Stable posture strengthens executive presence.                                    |

## V. VOICE &amp; COMMUNICATION ANALYSIS

| Metric               | Value      | Benchmark   | Insight                                                  |
|----------------------|------------|-------------|----------------------------------------------------------|
| Speech Rate          | 149 WPM    | 130-160 WPM | Within recommended range for clear, digestible delivery. |
| Pitch Stability      | 82% Stable | >85% Stable | Strong vocal consistency across responses.               |
| Filler Words         | 2.6 / 100w | <5 per 100w | Within acceptable range; filler usage is controlled.     |
| Articulation Clarity | 91% Clear  | >90% Clear  | Good articulation pace supporting intelligibility.       |

## VI. CONTENT &amp; TECHNICAL EVALUATION

- Relevance to Question: 90% topical alignment against prompted content.

INTERVIEW ANALYSIS REPORT

- Answer Structure: 86% structure score across response flow and sequencing.
- Logical Clarity: 88% clarity score based on response coherence and readability.
- Confidence Language: 82% confidence-language score across key answers.

VII. STRENGTHS

- Clear decomposition of technical problems and tradeoffs.
- Consistent engagement signals and active listening behavior.
- Controlled pacing with low filler-word interference.

VIII. AREAS OF IMPROVEMENT

- Include more quantified outcomes in project impact statements.
- Use explicit STAR transitions in long-form answers.
- Sustain camera alignment during extended architectural explanations.

IX. RISK INDICATORS

| Risk Factor            | Assessment & Justification                                                     |
|------------------------|--------------------------------------------------------------------------------|
| Flight Risk Assessment | Assessment based on engagement and intent signals indicates low mobility risk. |
| Stress Threshold       | Observed stress classification: Moderate Stress.                               |
| Culture Fit Conflicts  | No major communication or collaboration conflicts detected in session signals. |

X. FINAL HIRING RECOMMENDATION

RECOMMENDATION: Hire

## INTERVIEW ANALYSIS REPORT

**AI Assessor Synthesis:** Proceed to final round; assess architecture leadership depth and execution ownership.

## INTERVIEW ANALYSIS REPORT

## APPENDIX: RAW METRIC TELEMETRY (OPTIONAL)

| Timestamp | Event Detected                                        | Confidence |
|-----------|-------------------------------------------------------|------------|
| 04:02     | Micro-tension detected on distributed systems prompt. | 0.89       |
| 12:41     | Pitch remained stable during implementation defense.  | 0.93       |
| 21:18     | Strategic pause before system design response.        | 0.96       |
| 33:57     | Positive affect signal near closing summary.          | 0.88       |
